

Política De Qualidade

Since its foundation, GPTEC has chosen QUALITY as the guiding parameter of its venture. QUALITY understood in its broadest concept, that is, TOTAL QUALITY, through the commitment to meet the requirements of the Quality management system.

QUALITY represented by the perfect attendance to the CUSTOMERS, through the commitment to their requirements, through the delivery of products and services according to the specifications, in the agreed terms and at a competitive price.

QUALITY represented by the care and attention to industrial facilities, characterized by order, tidiness, cleanliness, organization and maintenance. GPTEC is always committed to the constant improvement of its quality through the application of modern and efficient control and prevention techniques that enable a continuous improvement in its structure and the improvement of the effectiveness of the quality management system.

QUALITY represented, mainly, by the valorization of its suppliers, community, environment and employees, verified by the resources allocated in social activities, notably in the constant incentive to TRAINING.

Our motto is: "Produce better, to produce more !!".
